SUPPLEMENTAL REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Bertilsson et al, WO 94/14941, discloses a dishwasher detergent enclosed in a water-dispersible or water-soluble capsule comprising 5-95% by weight of a nonionic surfactant (see page 3, line 34-page 5, line 2), an enzyme (see page 3, lines 6-33), 0-30% by weight of a solubilizer, such as diols and glycols (see page 5, lines 30-35), wherein the water-dispersible or water-soluble capsule has a volume of 1-10 mL and comprises gelatin (see page 5, lines 3-14). Specifically, note Examples 1-7, which disclose dishwasher detergents in a gelatin capsule comprising various enzymes, an alcohol ethoxylated nonionic surfactant, methyl laurate, butyldiethylene glycol and 8% by weight of free water. However, patentee differs from applicant in that Bertilsson et al does not teach or suggest in general an encapsulated dishwasher detergent that contains the specific surfactants required by applicant in the instant invention.

Accordingly, the claims viewed as a whole would not have been obvious to one of ordinary skill in the art at the time of the invention after viewing the prior art of record.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
